

← - 242 mm - → 12 mm ← Fixing tab

A model of the tin can be created using the measurements on the templates. This will help ensure the product meets the design criteria of fitting into the tin. Note the tin doesn't need to be sent off with the competition entry unless it is part of the design.

Mindsets also sell cap & ring sets that can be used to create a model <https://mindsetsonline.co.uk/?p=466>
