'Product in a Tin' 2018 Application Form (this is page 2, make sure you fill in page 1)

Student's Name (please print) _____

Student's School _____

Remember to check your product fits into the dimensions given for the tin.

Does it meet the entry criteria? Use the 'checklist' on the 2018 competition page at www.julieboyd.co.uk

Tell us more about your product: what it is, who it's for, how it meets their needs, what its function & purpose is and what materials it is made of. This section is important to help the judges understand your design. This section might also be used when deciding on which is the best out of several similar entries.

Use a separate sheet if necessary but make sure you attach it securely to your application form

What is your product?

Tick the materials you have combined in your product (you have to use one from at least 2 categories):

Wood

Plastic

Metal

Textiles

Paper/Board

Other types of materials (please name them)

Who is the typical user of your product?

Why are they the best ones to use?

Why is the product suitable for the user you have designed it for? E.g. What needs does it meet? When will they use it? What is the product's function/purpose?

Did you buy any of your materials as ready made components or parts or did you cut and shape things yourself?

Is there anything else the judges need to know about your design that will help them understand how you were inspired and how it works (carry on on a separate sheet if necessary).

Note for teachers: Tell us more about how you used the competition e.g. as a homework, running it as a module with several classes, as an internal competition with the best entries being submitted. This will help the judges decide who wins the teacher prize.
